We will pull out our funds before we allow this occur. How does some one even think that they should look into taking someone's life savings, and then giving them "a lifetime stream of income after retirement." The whole point of saving it is because we know will need more than Social Security can provide AND because it is ours therefore we can spend it as we wish, not \$500.00 at clip because someone thought we only needed that much a month.

OUR MONEY TO USE AND SPEND AS WE SEE FIT.
